SOLUTION ARCHITECTURE:

Solution Architecture: A complicated process with numerous sub-processes, solution architecture connects technological solutions to business issues. Its objectives are to

• Track down the most effective technological remedy for current business issues.

• Explain to project stakeholders the structure, traits, behaviour, and other features of the software.

• Specify the project's features, development stages, and solution needs.

• Offer the requirements by which the solution is created, handled, and given to the clients.
